PROFESSIONAL SUMMARY

AI Engineer with end-to-end experience building and deploying Generative AI systems, LLM-powered applications, and production-grade RAG pipelines. Designed and shipped a full-stack enterprise SaaS (live on Vercel) featuring a custom ATS scoring engine, Groq/Llama 3.1 integration, and multi-pillar security hardening. Proficient in LangGraph multi-agent orchestration, hybrid vector + keyword retrieval, prompt engineering, and FastAPI backends. Seeking AI Engineer or Generative AI Engineer roles to build scalable, real-world AI products.

SKILLS

Languages:	Python, SQL
Generative AI & LLMs:	LangChain, LangGraph, RAG, Prompt Engineering, LLM Integration, Groq API, Ollama, Embeddings
Vector Search:	FAISS, Semantic Search
ML & NLP:	Machine Learning, NLP, PyTorch, Transformers
Backend & Tools:	FastAPI, REST APIs, PostgreSQL, Docker, Git, Streamlit

PROJECTS

ResumeIQ — AI Resume Analyzer & ATS Optimizer

Tech Stack: Python, FastAPI, PostgreSQL, Groq API (Llama 3.1), SQLAlchemy, Pydantic,Docker

- Built and deployed a production AI SaaS that scores resumes against job descriptions using a custom Domain-Weighted TF Cosine Similarity engine — evaluating keyword match, skill match, experience quality, and formatting across a 100-point scale.
- Integrated Groq API with Llama 3.1 for LLM-powered semantic evaluation including seniority fit detection, equivalent skill matching, and structured output parsing.
- Developed REST APIs with FastAPI, implemented LLM prompt injection filtering and rate limiting for production security, and containerized the app with Docker for deployment.

AI Research Agent — Multi-Agent Autonomous Research System

Tech Stack: Python, LangGraph, Ollama (Qwen3), DuckDuckGo API, PostgreSQL, Streamlit

- Built a multi-agent AI system using LangGraph with three agents — Planner, Research, and Editor — for autonomous web research and structured report generation.
- Implemented agentic workflows covering task planning, real-time web retrieval via DuckDuckGo, and LLM-driven report synthesis with fully local Qwen3 inference via Ollama.
- Stored research history persistently in PostgreSQL and delivered results through an interactive Streamlit interface with downloadable PDF reports.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning	2022 — 2026
Annamacharya Institute of Technology and Sciences, Rajampet CGPA: 8.26	
Intermediate — MPC	2020 — 2022
Abhyas Jr. College, Proddatur Score: 72%	

CERTIFICATIONS

- Python Programming Certification — GeeksForGeeks
- Database Solutions Certification — Wipro TalentNext
- Machine Learning Certification — SkillDzire
